

Return AC Adapter Packing Guide

Need to return an adapter? No problem! Use our easy guides to safely package parts to ensure no damage occurs during shipping. Failure to do so could result in parts an ineligible return.

To get started, you'll need a sturdy box, the return adapter in its original protective bag or bubble pouch, bubble wrap, and packing tape.

Step 1: Line bottom of the box with protective bubble.

Step 2: Place adapter in original protective bag or bubble pouch on top of bubble.

Step 3: Place bubble over adapter. Use enough bubble to prevent movement. If returning multiple adapters, secure each part in its original packaging or protective bubble.

Step 4: Tape box and affix mailing label to ship back to AGP.
