

Return Plastics Packing Guide

FOR PALM RESTS, KEYBOARDS, BEZELS, TOP & BOTTOM COVERS

Need to return a part? No problem! Use our easy guides to safely package parts to ensure no damage occurs during shipping. Failure to do so could result in parts an ineligible return.

To get started, you'll need a sturdy box, the return part in its original protective bag or bubble pouch, and packing tape.

Step 1: Line bottom of the box with protective bubble.

Step 2: Place part in original protective bag or bubble pouch on top of bubble.

Step 3: Place bubble over part. Use enough bubble to prevent movement. If returning multiple parts, secure each part in its original packaging or protective bubble.

Step 4: Tape box and affix mailing label to ship back to AGP.
